#4d. From the data in 4-c: Create the barplot(). Write the codes and its result.

```
barplot(rbindIrisData,
        beside = TRUE,
        main = "Iris Data",
        xlab = "Characteristics",
        ylab = "Mean Scores",
        col = c("blue", "green", "yellow"),
)
```
